

Student International Program (ISP)

Last Updated Thursday, 08 October 2009

Our College community is committed to an international education program that values diversity and commitment to being active global partners. Our Senior Schooling Student International Program (ISP) begins in 2007. This is an exciting time for the College and we are looking forward to hosting students from Europe, Asia and South America.

Chancellor State College places great emphasis on caring for all students in the school. International students have a Home Group teacher, a Year level Coordinator, International Coordinator and Guidance Officer as well as Specialist English (ESL) teachers, to look after their needs. Short stay and long stay visitations offer opportunities for domestic and international students - our global community becomes real and relevant.
