

## Year 3-4 Term 2

### English

Students will learn all about creating an information text, and the different text structures and language features that are included. Students will also be practicing how to read fluently and accurately using a number of different texts.

### Mathematics

Students will continue number patterns about addition and subtraction, show odd and even numbers, match positions in maps and represent fractions, with Year 4 learning about decimals as well.

### Science

Students will learn all about the features of living and non living things in Year 3. Year 4 will look a little closer into the life cycle of animals and what helps animals survive.

### HASS

Students will learn all about different characteristics of places and mapping conventions, with Year 3 focusing specifically on countries close to Australia and Year 4 focusing on countries in Africa and South America.

### The Arts

Year 3 will be creating visual artworks from different countries and about different animals.

Year 4 will be creating artworks using media to show artworks from different countries and about different animals.

### Year 3-4 Team,

Mrs Wong

Mrs McKevitt

Mr Coleman-Mann
